

ALEKSANDAR TRUJIC

Web developer

PROFILE

Student majoring in Computer Science and a web developer. Programming enthusiast with good problem-solving skills ready to improve and learn new technologies. I have been learning HTML, CSS and JS for about two years now, and about a year ago I started learning Node JS with a goal to become full stack web developer. I have worked with Angular, React and a bit of Vue.js framework. My goal is to focus on React and develop MERN stack applications and web solutions.

HOBBIES

Programming
Soccer
Reading

EXPERIENCE

The Perfect Host: <https://licor43.homequiz.app/>

React.js – Next.js PWA

Built the frontend for PWA in Next.js. React Hooks were used throughout the whole application. NOTE: This is Beta version of the application and some minor changes are still being made. It is mobile only app at this moment.

Henkel Construction Website: <http://henkelconstruction.com/>

WordPress

Built the WordPress website for a construction company. I mainly used Elementor as a page builder + custom code for specific parts of the website.

smiley.com: <https://smiley.com>

Nuxt.js + Node.js/Keystone.js

Smiley was one of my first bigger scale applications. I built the full-stack application using Nuxt.js on the frontend and Keystone.js on the backend.
